Baking Rotifer-shaped Cookies

While attending the XVII Rotifer International Symposium in Rio de Janeiro, I heard that rotifers should inspire people beyond the circle of

rotiferologists. That idea stayed with me and followed me into the kitchen. With my wife's baking skills and a custom 3D-printed rotifer model, we produced a batch of rotifer-shaped cookies (Plate 1). The result? Edible rotifers!

We brought them to the II Neotropical Zooplankton Symposium in Brazil and distributed them freely among participants. The cookies were a great success among zooplankton researchers!
